¹Dirichlet boundary conditions, Dirichlet distribution, etc.

²Number theory, brother of Georg Ohm.

³**The Gauss.**

⁴Lipschitz continuous, Cauchy-Lipschitz theorem, etc.

⁵Jacobi operator, Jacobian in linear algebra, etc.

⁶Bessel functions, Bessel inequality, etc.

⁷Hilbert space, Hilbert transform, etc.

⁸Runge-Kutta method, Runge's theorem, etc.

⁹Nobel Prize in Physics: “*fundamental research in quantum mechanics, especially in the statistical interpretation of the wave function*”

¹⁰Born-Oppenheimer approximation, Oppenheimer-Snyder model, etc.
